

Coxswain Training Advanced Desktop Simulator

Portable simulator technology facilitates safe lifeboat launch drills while in port, with zero risk to person or property.

We are Transforming Marine Training

Through a mix of practical, blended and simulation-based learning we are transforming the way training is delivered - making the marine, construction and energy industries as a whole **safer, smarter** and more **efficient** through better training.

Our advanced desktop simulator allows your crew to practice multiple lifeboat drills onboard your vessel, at your premises or while in port, without the risk or expense of launching craft.

Key Features:

- ✓ Full range of lifeboat and launch vessels
- ✓ Instructor-less practice & assessment drills
- ✓ Joystick controlled visual monitor and optional VR headset
- ✓ Single fall, twin fall and free fall
- ✓ Embedded VHF radio
- ✓ Generate Advanced Coxswain Training (ACT) certificates automatically

The UK's biggest energy sector training provider.

Marine Services

Quayside

Marine Training Centre of Excellence

Our world-class marine facility, located at the Port of Aberdeen, boasts a 16-strong fleet including Verhoef free fall lifeboats, TEMPSC, daughtercraft and multiple fast rescue crafts.

In-Centre

Survival Training Centre of Excellence

We operate a huge range of seafarer courses at our OPITO, STCW, RYA and MCA-accredited survival training centres conveniently located in the port cities of Aberdeen and Newcastle.

Onboard

Let us do the leg work...

Reduce costs, travel and training days by having our onboard instructors train at your premises or onboard your vessel. Improve safety culture by training in a familiar environment.

Simulation

Fixed, portable and VR technology

Following recent investment of almost £1m, we are now the only provider globally to offer both simulator based *and* in-water OPITO Coxswain Free Fall / Twin Fall Further Training.

The UK's biggest energy sector training provider.
